

## CONNECTING THE WHOLE SYSTEM FOR SMALL FORMAT

### VOD Audio Input Terminal:

VOD (Video On Demand) is for commercial usage. It has Smart Auto Input Select function for both input terminal (VOD, DVD).

### Audio Output for Recording:

This is the stereo signal line-out for recording by-pass signal. It is not meant to be connected to the amplifier or home theater receiver.

### Audio Outputs for Main 1 and Main 2:

Main 1 audio output is stereo line-out for amplifier or home theater receiver with 1/4" unbalanced standard. Main 2 audio output is stereo line-out for amplifier or home theater receiver with XLR balanced standard.
