

SPEAKON Y CONNECTORS

SPEAKON CONNECTORS

INSTALLATION EXAMPLE

Mounting the Speaker to the Wall

Place the wall mount panel on the top of the speaker cabinet and put two screws to fasten it. Then, put four screws to hold the speaker firmly into the wall. Adjust the speaker up/down and left/right for rotation at different angles to achieve the maximum sound effect. Part Number: SL-001 (Optional) for wall.

Placing the Speaker on the Floor to Monitor Singing

Placing the Speakers on the Portable Stand

The speakers can be mounted on to the optional portable stand, (see figure below). Make sure that the mounting system (hardware, stand, etc.) is capable of supporting four times the weight (approximately 25 lbs per speaker) of the speakers. Part Number: AMS001B (Optional).

NOTE Please do not stack two-pieces of speakers onto the adjustable speaker stand. If you need two more speakers to increase the output volume, we recommend you to use a high power speaker instead of stacking two-pieces of speaker on the adjustable speaker stand for safety purpose. You may also contact us at www.bettermusicbuilder.com for professional advice.
